

Will We Know Each Other When We Meet?

Family Search Memories

Did you know you have a gallery ... a big beautiful amazing gallery where you can store your photos, documents, stories and audio files?

This gallery is your **MEMORY MUSEUM OF AWESOME!** The memories stored in your gallery can be tagged & shared in the memories section of the family search record of your deceased family members in your family tree.

BEFORE YOU COME TO CLASS... Download the Following Apps on Your Phone

Family Search Tree

Family Search Memories

Question #1: What can you include in your MEMORIES GALLERY?

Answer: Just about everything

Photos

Records

Documents

Personal Histories

Journals

Stories

Audio Recording

Recipes

And so much more!

Question #2:

Can you use the **Family Search Tree & Family Search Memories** apps to fill your gallery (Memory Museum of Awesome) on the web version of Family Search?

Answer: YES – YES – YES! Come to class and learn how!

Question #3: How do I add photos and other images to my Gallery?

1. While signed in to FamilySearch.org, hover over **Memories**, and click **Gallery**.
2. Click the **plus sign (+)** in the green circle.
3. Drag and drop content from your computer to the screen, or click **Choose Files**.
4. Each photo still has to be tagged individually, but the amount of content you upload at once is up to you.

Question #4: How do I create a NEW memory with photos?

1. While signed in to FamilySearch.org, hover over **Memories**, and click **Gallery**.
2. Click the **plus sign (+)** in the green circle.
3. Click **Create a Story**.
4. Enter your story and its title.
5. Include any photos.
 - o Click **Upload Photo** to select from your computer files.
 - o Click **Select from Gallery** to attach photos already present on FamilySearch.
 - o Click the **plus sign (+)** that appears beneath the original photos to add additional ones.

Question #5: How do I add a previously created personal history?

1. If the history has been saved as a PDF file use the steps listed in Question #3.
2. If the history is saved as a word or other text file use the steps listed in Question #4 and create a new story. Title the story whatever with the name of the history you are including
3. Copy the text from the previous document and paste into the newly created story

Question #6:

How do I tag a memory in my gallery so that it shows up in other people's memories?

1. Click the **Memories** tab, and then the **Photos** link. Then click the photo to open it. Note that untagged photos have a box displaying the words "tag photo" to remind you about tagging.
2. Click on a person's face in the photo you want to tag.
3. Drag and size the picture frame that appears until it surrounds the head area in the photo.
4. In the "Who is in this memory?" field, type the person's name and then select it from the list that appears (or select "Add New" if none of the names is a match). Now when you move the mouse over that person in the photo in Memories, the Tag appears with the person's name.

Tagging Memories 101: The difference between tagging living & deceased people

Deceased people

If you tag a memory to a deceased person in Family Search, it is easy to find:

- People who are signed in to FamilySearch.org can see it in Family Tree and in the Memories section of FamilySearch.
- Anyone can share it through social media, email, and direct URL links.

Living people

If you tag a memory to a living person in Family Search, it is harder to find than a memory attached to a deceased person:

- Only the submitter can see it in Family Tree and in the Memories section of FamilySearch.
- The submitter can share the memories through social media, email, and direct links. Once shared, the receiver can share the memory with others.

Question #7:

What else can I do with my photos, documents and other memories in Family Search?

View	Copy & share URL	Add event date
Add Title	Add to Album	Add event place
Tag	Add to <i>Likes</i>	Add memory description
